Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1984 Excerpt: .to an ACEC, cultural and historical sites, and special management areas scattered throughout the resource area. Although directional drilling is a negative impact because of cost feasibility, it should not prove to be significant as these are scattered tracts of about 40 acres and have moderate to low potential. Under this alternative, portions of all four WSAs (14,350 acres) would be recommended as suitable for wilderness designation. Even though two of the WSAs are rated as being moderate potential and two are rated as having low potential (see Table 4-8) this could be a significant negative impact, as it eliminates any possibility of developing the mineral resource that may be there. If tracts of federal surface are disposed of through land exchange or sale (18,788 acres may be considered for possible adjustment), potential problems with split estate ownership can be created. While these problems do not affect the availability of land for energy exploration, the loss of surface control may make exploration more complicated, more time consuming, and more expensive. Other Leasables The designation of the partial wilderness areas will have no effect on phosphate areas since the evaluated lands lie outside the wilderness boundaries. Disposal of approximately 1,200 acres, where the United States reserves minerals and splits the surface estate and mineral interests, could disrupt and delay future mineral development. Also, an additional road closure in Warm Springs Creek could temporarily impact phosphate exploration because of seasonal disruption. Locatables Mineral location would be available...
