THE VALE OF TAY. 32. The river Tay is well known to be, of all British rivers, that which pours the greatest quantity of water into the ocean. With its large tributaries, the Earn, Isla, Tummel, Garry, c, it drains about 3000 square miles of country, f a large proportion of which is hilly. The last twenty miles of its course is an estuary--the Firth of Tay--but the sea affects the river somewhat further up, namely, to a point a little above Perth. 33. The relics of ancient alluvia are abundant throughout this great valley. 34. The Firth of Tay lies between the quickly rising grounds of Fife on the south side, and the Carse of Gowrie on the north. The latter, as is well known, is an alluvial plain, ten or twelve miles in In the mean state...
