By United States Patent Office

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: .over a vast area, and the discharge frequently takes place through the insulation of the armature to the wires, thus escaping throughout the system. Very high insulation of mica and other insulating substances are thus pierced and destroyed by the discharges. The purpose of the present invention is to provide means whereby the electricity which is thus caused to charge the driving-pulley may escape in dependency of the armature, and thus avoid injury thereto. The invention consists in equipping the generator with discharge-points which are supported by bill insulated from the frame of the generator and directed toward the beltwheel. These points are connected electrically with the earth. A harmless discharge may take place at all times from the pulley to the points, and thus to the earth or to the driving-engine. In the accompanying drawing there is shown an...
