

Kansas University Quarterly Volume 6 (Paperback)

By University Of Kansas

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: . distally; pubis without antero-proximal process. The genus *Holeodus* Gibbes was proposed for the reception of a species supposed by him to be represented by three teeth from Alabama, South Carolina and New Jersey. Two of these were figured in his work cited (pi. iii, ff. 6-9), with the following description: They are solid, and resemble in their pyramidal form those of *Mosasaures hoffmani* antero-posteriorly, the dividing ridges making the anterior and posterior surfaces equal, and they are both convex. They are also acutely pointed. In *Mosasaurus* the outer surface is plane or nearly so, and both have longitudinal narrow planes near the base. In the teeth under notice, on the outer half are many planes, almost grooves, and also on the inner face, which is peculiarly striated toward the base. As the striated character is a structural distinction, the name *Hiflcodus* is given to the...
