GAO assessed the Army's inactivation of the 9th Infantry Division at Fort Lewis, Washington, and activation of a separate motorized brigade from division assets, to determine whether the Army's personnel and equipment practices had implications for future downsizing and restructuring efforts. GAO found that: (1) Fort Lewis officials chose an inactivation approach that emphasized maintaining readiness, minimizing reassignment hardships for soldiers and their families, and minimizing time spent to prepare equipment for return or transfer; (2) Fort Lewis personnel practices included laterally transferring troops from inactivated units to units that would transition to the new brigade, and reassigning troops to other Fort Lewis units; (3) Fort Lewis equipment management practices included requiring the return of mission-capable equipment to the installation supply system, exercising flexibility about maintenance schedules, and accepting non-working but repairable weapons into the installation supply system; (4) about 67 percent of troops from inactivated units were reassigned at Fort Lewis; (5) the fact that most of the troop reductions occurred after activation of the new brigade suggests that there is a trade-off between maintaining readiness and achieving rapid personnel...
