Original publisher: Arlington, VA : National Coordination Office for Information Technology Research and Development, 2004 OCLC Number: (OCoLC)56190589 Subject: Medical records -- United States -- Data processing. Excerpt: . . . 91749 NOESIS newtext w Links. qxp 7 20 2004 1: 03 PM Page 3 OVERVIEWThe absence of necessary patient information and medical knowledge in the hands of decision makers at the point of clinical decision making. An information recording system that relies heavily on human interpretation (e. g. , handwriting, dosages). The rapid pace of medical advances, which overwhelms the ability of caregivers to keep up. The key to solving these problems is greater reliance on IT: to present the health care provider with appropriate patient information and knowl-edge resources at the point of clinical decision making; to record clinical concepts and events in standard, legible, and computable ways; and to check for potential errors in the decision-making process. Currently, most U. S. hospitals, outpatient settings, and other sites of care lack the 9 kind of health IT infrastructure that would support these solutions. Nationwide implementation of health information technology is the only...
